€ EURO - Coins

The front sides of the EURO-coins are uniformly created without national differences and show Europe, the star ring of the European Union, as well as the nominal values; the design is from the belgian banknote designer Luc Luycx. The backsides of the EURO-coins have different national motives. All EURO-coins are legal tenders in the whole EURO-area and so they can be used in every country of the EURO-area.

The distinction and the fake security are also for the coins very important. The coin categories are different in weight, size, material, colour, thickness and knurling. All specification without guarantee according to the newest EU specifications.

	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal: Form/Knurling:	16.25 1.67 2.3 Steel with copper coating Kupferauflage red round/smooth
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal: Form/Knurling:	18.75 1.67 3.06 Stahl mit Kupferauflage rot round/smooth with groovesEinkerbungen
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal:	21.25 1.67 3.92 Steel with copper coating Kupferauflage red

	Form/Knurling:	round/smooth
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal: Form/Knurling:	19.75 1.93 4.10 Nordic Gold Cu89Al5Zn5Sn1 yellow round/Edge coinage with soft wave structure Randprägung mit feiner Wellenstruktur
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal: Form/Knurling:	22.25 2.14 5.74 Nordic Gold yellow Spanische Flower" /without Edge coinage Randprägung
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Material Colour of the metal: Form/Knurling:	24.25 2.38 7.50 Nordic Gold yellow round/ Edge coinage with soft wave structure Randprägung mit feiner Wellenstruktur
	Diameter (mm) Thickness at the edge of the coin (mm) Weight (g) Core Material Ring Material Colour of the metal: Form/Knurling:	23.25 2.33 7.50 Cu75Ni25/Ni7/Cu75Ni25 CuZn20Ni5 White inside/yellow outside round/broken grooved
	Durchmesser (mm) Dicke am Rand der Münze (mm) Gewicht (g) Core Material Ring Material	25.75 2.20 8.50 CuZn20Ni5/Ni12/CuZn20Ni5 Cu75Ni25

	Colour of the metal:	White outside/yellow inside
	Form/Knurling:	round/Writing coinage on the edge of the coin, soft groved Schriftprägung auf dem Münzrand, fein geriffelt
